PROFESSIONAL SUMMARY

Operations professional with over 3 years of hands-on experience in offshore oil and gas production and petrochemical processing. Skilled in DCS and ICSS operations, process monitoring, production optimization, and Process Safety Management (PSM). Improved production reporting efficiency by 400 hours annually (8 hours per week) through Excel VBA automation integrated with a Telegram bot. Recognized for safe operations, troubleshooting, root cause analysis, and coordinating cross-functional teams across multi-platform offshore facilities and chemical plants.

EDUCATION

Advanced Technical Diploma in Petrochemical Technology *Oct 2015 – Oct 2020*

El-Wardian Advanced Technical Industrial School (Petrochemical Department)

Grade: Excellent | Ranked 8th in Petrochemical Technology Department

PROFESSIONAL EXPERIENCE

Operations Technician *Jul 2026 – Present*

Al Ezz Dekheila Steel Co. (EZDK) – Ezz Steel | Alexandria, Egypt

- Undergoing operational and technical training on steel manufacturing processes, safety standards, plant operations, and industrial control systems.
- Developing knowledge of production systems, operational procedures, HSE standards, and best industrial practices.

Oct 2024 – Jun 2026

Offshore Production Operator

Abu Qir Petroleum Company | North Abu Qir Field, Egypt

- Ran and monitored offshore production systems (DCS, ICSS, SCADA, and field) across multi-platform facilities and subsea wells, ensuring safe operations in compliance with SOPs and Process Safety Management (PSM).
- Safely managed production rates up to 140 MMSCFD of gas and 3,500 BBL/D of oil across 3 offshore platforms.
- Designed and implemented Excel VBA reporting automation (macros and dashboards) integrated with a Telegram bot, reducing manual workload by 8 hours per week (400 hours annually) and improving data accuracy across operations teams.
- Coordinated and supervised operations of 2 unmanned platforms from the Master Platform, including field inspections, operational follow-up, and maintenance support, achieving zero production interruptions.
- Monitored and supported process and utility systems including WHCP, HPU, umbilical monitoring, chemical injection, fire and gas systems, H2S monitoring, and ESD/PSD/LSD safety systems.
- Interpreted P&ID, PFD, and Cause & Effect diagrams to support troubleshooting, root cause analysis, and process optimization, collaborating with engineering and maintenance teams to improve equipment reliability.
- Applied Permit to Work (PTW), Lockout/Tagout (LOTO), and Process Safety Management (PSM) procedures to maintain safe work environments during 100+ maintenance interventions.

Production Technician *Mar 2023 – Sep 2024*

International Industrial Chemical Park | Alexandria, Egypt

- Controlled chlorination reactions of Heavy Liquid Paraffin (HLP) in Chlorinated Paraffins (CPs) production, optimizing chlorine concentration (45–52%) to achieve product specifications and quality standards.
- Ran absorption and off-gas treatment systems for production of Hydrochloric Acid (HCl 32%) and Sodium Hypochlorite (NaOCl 18%) by-products, ensuring compliance with safety and environmental procedures.
- Maintained and monitored reactors, UV-assisted reactors, heat exchangers, pumps, blowers, and degassers to sustain continuous production.
- Ensured safe handling of chlorine, HCl, NaOCl, and other hazardous chemicals in compliance with operational and safety protocols, maintaining zero lost-time incidents (LTI) over 18 months.
- Supported preventive and corrective maintenance, root cause analysis, and troubleshooting to reduce unplanned downtime.

CERTIFICATIONS

BOSIET 5700 (OPITO Approved) *Oct 2025*

Arab Academy for Science, Technology and Maritime Transport

HUET with EBS; Firefighting & Self-Rescue; Sea Survival & First Aid / Hypothermia

30-Hour General Industry OSHA Compliance Course (NASP/IASP Approved) *Apr 2025*

Egyptian Syndicate of Scientific Professions

Covered workplace hazards, industrial safety procedures, and OSHA standards.

Life Saving Rules *Sep 2025*

Abu Qir Petroleum Company

Focused on critical safety rules, hazard prevention, and best practices in oil & gas operations.

Cybersecurity 101 *Feb 2026*

Gammal Tech Academy

Covers cybersecurity fundamentals, cyber threats, attack surface concepts, social engineering, phishing awareness, and basic data protection practices relevant to OT / industrial control systems

Petroleum Industry Fundamentals Diploma (44 Hours) *Jul 2024*

Egyptian Syndicate of Scientific Professions

Basics of crude evaluation, refining units, and operation of key utilities/equipment (distillation, separators, furnaces, heat exchangers, pumps).

SKILLS

Process Operations: Field Operations, Control Room Operations, Process Monitoring, Production Reporting, Abnormal Condition Response.

Control & Shutdown Systems: DCS, ICSS, SCADA, ESD, PSD, LSD, Fire & Gas Systems, Alarm Monitoring.

Process Systems & Equipment: P&ID and PFD Interpretation, Cause & Effect Matrix, Pumps, Compressors, Heat Exchangers, WHCP, HPU, Umbilicals, Chemical Injection Systems.

Process Safety: Process Safety Management (PSM), Permit to Work (PTW), Lockout/Tagout (LOTO), H2S Monitoring, Emergency Response Procedures, Risk Assessment, Life Saving Rules.

Production Data & Automation: Microsoft Excel, Excel VBA, Macros, Automated Production Reports, Data Consolidation, Trend Analysis, Dashboards, Microsoft Word.

Technical Documentation: Standard Operating Procedures (SOPs), Shift Logs, Production Reports, Safety Reports.

Additional Skills: Cybersecurity Fundamentals, Troubleshooting, Analytical Thinking, Collaboration, Decision-Making, Problem-Solving, Reliability, Teamwork.
