Professional Summary

Operations professional with hands-on experience in offshore oil & gas production and petrochemical processing. Proven background in DCS/ICSS operations, process monitoring, production optimization, and process safety management across offshore platforms and chemical plants. Recognized for improving operational efficiency through automation and data-driven reporting while maintaining high standards of safety, reliability, and production performance.

Professional Experience

Operations Technician | *Al Ezz Dekheila Steel Co. EZDK | Ezz Steel* Jul 2026 – Present

- Currently undergoing operational and technical training on steel manufacturing processes, safety standards, and plant operations.
- Developing knowledge of production systems, operational procedures, and best industrial practices.

Offshore Production Operator | *Abu Qir Petroleum Company* Sep 2024 – Jul 2026

- Operate and monitor offshore production systems (DCS/ICSS and field) across multi-platform facilities and subsea wells in the North Abu Qir Field, ensuring safe and efficient operations in compliance with SOPs and Process Safety Management (PSM).
- Manage production rates of up to 140 MMSCFD of gas and 3,500 BBL/D of oil.
- Designed and introduced an **Excel VBA-based** production reporting automation system, integrated with a Telegram distribution bot, reducing manual workload by approximately **8 hours per week**, improving data accuracy, and accelerating report delivery across operations teams.
- Coordinate and supervise operations of two unmanned platforms from the Master Platform, including field inspections, operational follow-up, and maintenance support to ensure production continuity.
- Monitor and support the operation of process and utility systems, including WHCP, chemical injection, and associated production facilities.
- Support troubleshooting activities and collaborate with engineering and maintenance teams to optimize equipment reliability and plant performance.

Production Technician | *International Industrial Chemical Park* Mar 2023 – Sep 2024

- Controlled chlorination reactions of Heavy Liquid Paraffin (HLP) in Chlorinated Paraffins (CPs) production and optimized chlorine concentration (45–52%) to achieve required product specifications and quality standards.
- Operated absorption and off-gas treatment systems for the production of Hydrochloric Acid (HCl 32%) and Sodium Hypochlorite (NaOCl 18%) by-products while ensuring compliance with safety and environmental procedures.
- Operated and maintained process equipment, including reactors, UV-assisted reactors, heat exchangers, pumps, blowers, and degassers.
- Ensured safe handling of chlorine, HCl, NaOCl, and other hazardous chemicals in compliance with operational and safety protocols.

Education

Advanced Technical Diploma in Petrochemical Technology 2020

El-Wardian Advanced Technical Industrial School (Petrochemical Department)

- Grade: Excellent | Ranked 8th in Petrochemical Technology Department

CERTIFICATIONS

BOSIET 5700 (OPITO Approved) | Issued: Oct 2025

Arab Academy for Science, Technology and Maritime Transport

- HUET with EBS; Firefighting & Self-Rescue; Sea Survival & First Aid / Hypothermia

30-Hour General Industry OSHA Compliance Course (NASP Approved) | Issued: Apr 2025

Egyptian Syndicate of Scientific Professions - Certification Code: 648951

- Covered workplace hazards, industrial safety procedures, and OSHA standards.

Life Saving Rules | Issued: Sep 2025

Abu Qir Petroleum Co. / Certification Code: 7317

- Focused on critical safety rules, hazard prevention, and best practices in oil & gas operations.

Cybersecurity 101 | Issued: Feb 2026

Gammal Tech Academy / Certification Code: GT-2026-000080

- Covered cybersecurity fundamentals, cyber threats, attack surface concepts, social engineering, phishing awareness, and basic data protection practices relevant to OT / industrial control systems.

Petroleum Industry Fundamentals Diploma (44 Hours) | Issued: Jul 2024

Egyptian Syndicate of Scientific Professions - Certification Code: C15S346

- Basics of crude evaluation, refining units, and operation of key utilities/equipment (distillation, separators, furnaces, heat exchangers, pumps).

SKILLS

- Emergency Shutdown Systems (ESD, PSD, LSD)
- DCS/ICSS operations and process monitoring
- Fire & Gas systems testing
- H₂S monitoring and emergency response procedures
- WHCP, HPU, umbilical monitoring, and chemical injection systems
- P&ID and PFD interpretation; Cause & Effect analysis
- Rotating and static equipment (pumps, compressors, and heat exchangers)
- Process optimization, troubleshooting, and root cause analysis
- Permit to Work (PTW), Lockout/Tagout (LOTO), and Process Safety Management (PSM)
- Preventive and corrective maintenance
- Subsea systems support and wellhead operations familiarity
- Excel VBA automation and production reporting (macros and dashboards)
- Production reporting, data consolidation, and trend analysis
- Technical documentation, including SOPs, shift logs, maintenance reports, and safety reports
